

Top Pallet ESD 68920 for the Electronics Industry

Due to its proximity to the electronics assembly industries and final PCB users for over 30 years in the field, Von Roll is the leader in terms of innovation and product range adequate to meet all standards and specific technical requirements.

Von Roll has developed a new specific Top Pallet ESD 68920 reference for ensuring the holding and positioning of PCB boards and its components, and for optimizing soldering process with full ESD material.

Properties of Top Pallet ESD 68920

- » ESD safe, black color
- » Excellent machinability (especially against woven glass cloth products)
- » Good mechanical properties, especially flexural strength and compressive strength
- » Good chemical attack resistance
- » Good temperature resistance at proximity of soldering bath
- » Availability in sheets of 1950 x 950 mm, thickness 6, 8, 10 or 12 mm, or machined parts

Properties of Top Pallet ESD 68920

- » Cover pallets only. For bottom pallets please use our dedicated CDM® product range
- » ESD support storage boxes for components or PCBs
